

## JOHN KERRY on the ENVIRONMENT (part one)

“We know intuitively that America is only as healthy as the water our children drink, the air they breathe, the yards and parks in which they play and laugh, and the communities in which they live. The question is whether armed with that knowledge our generation will leave our children . . . an earth that is cleaner . . . more beautiful . . . healthier and safer.”

Senator John Kerry has and will:

- Fight for Clean Air (limit mercury, sulfur, nitrogen, and carbon dioxide from power plants)
- Provide Clean Water (opposed Bush's attempt to rollback drinking water standards)
- Protect Marine Ecosystems (wrote legislation banning dumping off our coasts)
- Protect Open Space (supports Land and Water Conservation Fund to protect farms, forests, and parks)
- Expand Farmland Conservation (supports Wetlands Reserve and other programs to improve water quality, reduce soil erosion and provide habitat for wildlife)
- Helped Stop Oil Drilling in Arctic National Wildlife Refuge

**John Kerry has been called the Senate's most outspoken environmentalist**
